SUMMARY

Data Analyst with 7 years of experience working with data collection, validation, processing, analysis, reporting, and visualization within a national statistical institution. Experienced in survey and census workflows, healthcare data systems, data quality, SQL Server, R, Python, Excel, and interactive dashboards. Skilled at turning complex operational and statistical data into reliable insights and actionable information for stakeholders.

WORK EXPERIENCE

Data Analyst, BPS-Statistics Indonesia

Jan 2021 - Present

- Processed and analyzed national-level survey data and financial statement data to generate insights and support reporting and decision-making.
- Developed and maintained a data platform for collecting, transforming, validating, and analyzing financial statement data using R and Python.
- Engineered data workflows using R, Python, Google Sheets, Excel, cloud storage, and SQL Server to improve data integrity, availability, and processing efficiency.
- Built dashboards using React.js, Looker Studio, and Apache Superset to visualize key metrics and communicate analytical findings to stakeholders.
- Developed a healthcare web application using React.js and Fastify supporting operational management, financial management, HR, supply chain, and regulatory compliance.
- Built data-entry, processing, validation, and monitoring workflows with interactive dashboards for operational data management.
- Developed secure GraphQL APIs and SQL Server data structures to support healthcare application data integration and internal systems.

Data Analyst, BPS-Statistics (Sanggau Regency Office)

Jan 2019 - Dec 2020

- Participated in surveys and censuses across preparation, data collection, data entry, validation, analysis, and dissemination stages.
- Built automated cloud-based data pipelines for regional data aggregation and reporting, improving data processing efficiency.
- Designed and maintained staff databases using Google Sheets and Excel, with emphasis on data integrity and availability.
- Developed web and desktop applications using R and Java to automate data collection and processing.
- Built employee management and workflow automation tools using Visual Basic and Excel.
- Prepared statistical publications and reports to communicate official statistical data to public audiences.
- Supported statistical activities through data processing, map digitization, and technical operations.

EDUCATION

Bachelor of Computational Statistics

Oct 2014 - Sep 2018

Politeknik Statistika STIS

ADDITIONAL INFORMATION

- Technical Skills:
 - Statistical Data: Survey and census data, data collection, data validation, data processing, data analysis, reporting, data quality, statistical dissemination
 - Data Analysis: R, Python, SQL, Excel, VBA, Google Sheets
 - Data Visualization: Tableau, PowerBI, Superset, Data Studio, and JavaScript
 - Data & Application Engineering: SQL Server, GraphQL, REST APIs, Node.js, React.js, TypeScript
 - Project and Database Tools: DBeaver, SSMS, Notion, Excel, Trello, ClickUp, Spreadsheets
 - Reporting & Documentation: Microsoft Word, Adobe InDesign, Notion
- Certifications: React Developer, Data Engineer, Big Data for Social Science, and Graphic Designer
- Languages: English, Indonesian
